Notes:

i. The unemployment figures shown use the International Labour Organisation (ILO) definition used in the Labour Force Survey and APS.

ii. This definition includes people who are: without a job, have actively sought work in the last four weeks and are available to start work in the next two weeks; or are out of work, have found a job and are waiting to start it in the next two weeks.

iii. The unemployment rate is expressed as a proportion of the economically active population aged 16 and over.

iv. The APS data is subject to sampling variability which increases at a local authority level.

LABOUR MARKET STATISTICS APRIL 2019

Unemployment (survey-based).

Data released: 16 April 2019.

Notes:

i. The unemployment figures shown use the International Labour Organisation (ILO) definition used in the Labour Force Survey and APS.

ii. This definition includes people who are: without a job, have actively sought work in the last four weeks and are available to start work in the next two weeks; or are out of work, have found a job and are waiting to start it in the next two weeks.

iii. The unemployment rate is expressed as a proportion of the economically active population aged 16 and over.

iv. The APS data is subject to sampling variability which increases at a local authority level.
