

Please see our Covid-19 Emergency Day Support Building Plan that details which Buildings are currently open across Swansea providing day support and their current capacity due to social distancing. These buildings have been identified to be opened first in response to demand and, with safety as our primary concern, initially using buildings best suited to social distancing. This Building Plan will be updated on a regular basis.

Social workers are available to discuss your current situation and support you may need and we encourage you to get in touch with them to discuss your day support needs, to explore in more detail the options we have listed here and the arrangements that could be put in place for you. Please contact your Social Worker on 01792 614100, or the Common Access Point by email at CAP@swansea.gov.uk or on 01792 636519.

COVID-19 Emergency Day Support Buildings Plan
